Range then locator: [1–3, 4^{§3.2}]

Locator then range: [1^{§3.2}, 2–5]

Interleaved: [1–3, 4^{eq.2.1}, 5–7]

Italic context

The derivation [6^{§3.2}_{eq.4.3}] proceeds from the Bianchi identity.

Realistic paragraph

The Schwarzschild metric [6^{§6.1}_{¶2}] describes the vacuum exterior of a spherically symmetric mass. The geodesic equation can be found in standard references [6^{§3.2}_{eq.4.3}, 7^{□21.1}]. For the original field equations see [1–5].
